

## **Art & Economy - Economy & Art**

### **Portfolio by Emmeline zu Knyphausen**

---

In this portfolio, I want to show the meaning and relation between economy and art by using brands and artists of high value which ought to represent the economy as well as the art.

The concept relies on the composition of various means to showcase the relation. During the process, I was educated on how to think complexly and learned many new techniques on how to create a consistent composition. To achieve this, I had great help by *Sybille Kreynhop* from the *Kunstschule Atelier Sybille Kreynhop* in Hamburg, Germany.
